Are the floors in your hospital safe?

WESSEX TEST Equipment Ltd is one of only two manufacturers of the British Pendulum Skid Tester. The Pendulum is the only machine sanctioned by the Health and Safety Laboratories for accurate testing of pedestrian walkways in both dry and wet conditions.

Wessex Test Equipment Ltd undertake independent testing of your floors supported with a full report, if needed recommendations are given as to how you can resolve any problems that may arise from these tests.

We have carried out tests in a number of varied locations, e.g: railway platforms, football stadia, NHS clinics in Scotland as well as numerous shopping centres and office blocks country wide.

Wessex Test Equipment Ltd also manufactures the Tortus 3 Floor Friction Tester, this can be used for ongoing monitoring of your floors, allowing you to pick up any changes in the floor surface at an early stage and thus remedy it before any problems occur.

If you would like an independent and confidential test carried out on your floors then contact our office to arrange a visit from one of our test engineers.
